Outlook® 2007

O2 may change the contents of the Xda Orbit 2 box in the future.
The images here are purely to illustrate what's in the box – the actual contents may look slightly different.

Install the SIM Card

Ensure that the device is turned off and slide the battery cover off.

Push the SIM card holder to the right to unlock it.

Flip the SIM card holder up.

Insert the USIM/SIM card with its gold contacts facing down and its cut-off corner facing the battery compartment.

Push the SIM card holder down until it snaps into place to lock it. When you insert the battery, the SIM card lock secures the SIM card in place.

Installing and charging the battery

You will receive the new battery partially charged. So before you start using your Xda Orbit 2 you will need to fully charge the battery.

Install the battery by aligning its exposed copper contacts with the battery connectors inside the battery compartment. Insert the contact's side of the battery first, then gently push the battery into place. Replace the back cover.

Charge the battery by plugging the AC adapter in to an electrical outlet. Plug the USB end to the sync connector port at the bottom of the device.

The battery will be fully charged after about three hours.

Installing a storage card

A storage card slot is located on the right side of your device. To have additional storage for your images, video, music and files, you can purchase a MicroSD™ card and insert it into the slot.

To insert a MicroSD card

1. Open the storage card slot cover.

2. Insert the MicroSD card into the slot with the gold contacts facing up.

3. Replace the card slot cover.

Note: To remove the MicroSD card, press the MicroSD card to eject it from the slot.

To turn the device on or off

It's easy. Just press and hold the POWER button for about three to five seconds. This will turn your Xda Orbit 2 on or off. You'll see a message on the screen when it's switching off. Tap Yes to turn off the device.

Synchronise your Xda and PC

It's easy to synchronise your computer with your device. This enables you to keep information like contacts, emails, tasks, and appointments up-to-date on your Xda Orbit 2.

To set up synchronisation software on your PC

The synchronisation software you need will depend on your computer's Operating System (OS).

Either use Microsoft ActiveSync® 4.5 (or later) or Windows Mobile® Device Centre to synchronise your device with your computer.

To set up ActiveSync on Windows XP

1. Install ActiveSync 4.5 on your PC from the Getting Started section of your In-box CD.

2. Connect your Xda Orbit 2 to your computer. You'll see that the Synchronisation Setup Wizard automatically starts and will guide you to create a synchronisation partnership. Click **Next** to proceed.

3. To synchronise your device with your computer, clear the 'Synchronise directly with a server running Microsoft Exchange' check box and then click **Next**.

4. Select the information types that you want to synchronise, then click **Next**.

5. Choose whether to allow wireless connections while your device is connected to the computer.

6. Click **Finish**.

To set up Windows Mobile™

1. Connect your device to your computer. Windows Mobile Device Centre will open. On the screen, click **Set up your device**.

2. Select the information you want to synchronise and click **Next**.

3. Type in a name for your phone and click **Set Up**.

TouchFLO™

TouchFLO™ gives you better touch panel experience on your device. Using TouchFLO, you can easily scroll and pan the screen by sliding your finger on the touch panel. TouchFLO also has the Touch Cube where you can add your favourite contacts, access media, launch programs, and more.

Finger scrolling

While on a web page, document, or list (such as contacts list, file list, etc.), slide your finger upward to scroll up or slide your finger downward to scroll down.

To scroll to the right, slide your finger to the left. To scroll to the left, slide your finger to the right.

Finger panning

Touch and hold on the touch screen and then drag your finger around the screen.

Touch Cube (see opposite)

To open the Touch Cube, slide your finger upward, starting from the bottom of the touch screen where it shows the O₂ logo.

To close the Touch Cube, slide your finger downward.

Touch Cube is a cubic user interface. To flip the interface from one side to another, slide your finger left or right on the touch screen.

To send a text message

Send short text messages (SMS) up to 160 characters long to other mobile phones:

1. Tap Start > Contacts.

2. Slide your finger upward on the touch screen to scroll down the contact list. See 'Finger scrolling' and 'Finger panning' on page 10 for more details on finger scrolling.

3. Touch the contacts name to open his or her contact card.

4. On the contact card touch Send text message.

5. A new text message is then created. To add more recipients, enter their mobile phone number in the To field, separating them with a semicolon. You can also tap To if you want to add mobile phone numbers from Contacts.

6. Enter your message.

   To quickly add common messages, tap Menu > My Text and tap a desired message.

   To check the spelling, tap Menu > Spell Check.

7. Tap Send.

To make a call

1. Press the Talk button or Start > Phone.

2. On the phone keypad, touch the keys with your finger or tap the keys using the stylus to enter the phone number.

3. The Smart Dialling panel will display the matching numbers in Call History as well as the matching contacts found on your device and SIM card. Select the number or contact you want to call then press Talk. To make a video call, touch/tap ⛶ instead of pressing Talk.

For hands-free phone conversation, connect the USB stereo headset or a Bluetooth® headset (not included) to your device.

To learn how to connect a Bluetooth headset, refer to the Full User Manual.

Take a picture

Use your Xda Orbit 2 to capture those precious moments.

1. Press the CAMERA button all the way in. The screen will automatically switch to landscape mode when you use the camera.

2. Tap to change the camera settings.

3. Tap to choose the resolution and other settings.

4. Tap to choose capture modes.

3. Press ENTER to take the shot.

Send an MMS

The photos you take will be automatically saved to the My Pictures folder. You can send photos by MMS by tapping ✉.

Or you can choose to delete by tapping 🗑 after taking the photo. The Full User Manual which comes with your Xda Orbit 2 offers a more complete guide.

To personalise your Xda Orbit 2

You can personalise the screen appearance of your Xda Orbit 2.

If you want to change the Today screen:

Tap Start > Settings > Personal tab > Today.

If you want to set the date and time:

Tap Start > Settings > System tab > Clock & Alarm > Time tab.

If you need to manage your power settings:

Tap Start > Settings > System tab > Power > Advanced tab.

Go online and surf the web

To get online, turn on Wi-Fi® on your device.

If there is no Wi-Fi hotspot in your area, you can still connect to the Internet by using the GPRS or dial-up service of your wireless service provider.

Please refer to the Full User Manual to learn how to connect using GPRS or dial-up settings.

If you are using Wi-Fi:

1. Tap Start > Programs > Comm Manager and tap the Wi-Fi button.

2. Select the wireless network you want to connect to and tap OK.

3. Select The Internet and tap Connect

Note: If you are connecting to a secured wireless network, you may first need to enter the network connection.

Use Internet Explorer® Mobile (tap Start > Internet Explorer) to surf the web.

Send and receive email

You can set up your Xda Orbit 2 to send and receive emails using your preferred email service.

To send or receive email:

1. Tap Start > Messaging > New Email Account.

2. Type in your Email address and tap Next.

3. If this doesn't work then manually enter the settings in the following screens.

4. Type in Your Name and Account Display Name. Tap Next.

5. Type in the User name and Password for the email account. Tap Next.

6. Select the frequency to send and receive email. Tap Finish.

You can also synchronise your device with your company's Microsoft Exchange server to receive work emails. Please refer to the Full User Manual if you want to access your company email account using your Xda Orbit 2.

Sat Nav

In order to activate your Sat Nav, you will need to have the CoPilot Live version 7 Licence key and Micro SD Card.

In some cases you may have to purchase the Sat Nav accessory pack. To do this, please get in touch with your usual O₂ point of contact.

Secure your Xda Orbit 2

You can protect your device from unauthorised access by using the SIM PIN or the device lock.

A. To enable SIM PIN

You will first need to enter a password to enable the SIM PIN before you can use the phone features of the device.

To use the SIM PIN, tap Start > Settings > Personal tab > Phone and select Require PIN when phone is used.

B. To enable device lock

The device lock requires a password to unlock the device after it has been left idle for a set period of time.

To enable this

1. Tap Start > Settings > Personal tab > Lock.

2. Select the 'Prompt if device unused for' check box and enter the time you want.

3. Select the Password type.

4. Enter and confirm the password, then tap OK.

Section 2

A tour of your Xda Orbit 2

1. Earpiece

2. Power Button

3. Second camera

4. Talk button

Press to answer an incoming call
or dial a number.

5. Windows start button

Press to launch windows.

6. Navigation wheel/Enter

Press up, down, left and right,
or rotate the wheel to move
through menus and programme
instructions. Press the centre of
the navigation button to carry
out the selection.

7. OK button

Press OK to confirm actions and to
close applications and screens.

8. End button

Press to end a call or return to the
Today screen.

11. Touch screen

Tap the screen with the stylus to write, draw or select.

12. Stylus

You can use the stylus to write, draw or select items on the touch screen.

13. Status Indicators

The Today screen displays important information, such as upcoming appointments and status indicators. Some of the status icons that you may see on your Xda Orbit 2 are listed on pages 28–29.

14. GPS antenna connector

You can connect an external GPS antenna to get a better GPS signal.

15. Camera

Use the camera to take still photos and record video clips.

16. Voice Command
Press to start Voice Speed Dial; press and hold to record a voice note.

17. Volume slider
Slide it up or down to adjust the speaker volume.

Slide it up or down to adjust the earpiece volume during a call.

18. Strap holder
This lets you attach a strap for carrying your Xda Orbit 2.

19. MicroSD card slot

Let's you insert a storage card (Mini SD format) for storing data.

20. Camera button

Press to launch the camera and press again to take a photo or video clip, depending on the specified capture mode.

19

20

21   **22**   **23**

21. Battery cover latch

Slide this latch to release the battery cover.

22. Sync connector/ earphone jack

Use this connector to synchronise data by connecting the provided USB Sync cable or to recharge the battery via the provided AC charger. You can also use the USB stereo headset for hands-free conversation or to listen to FM radio and audio media. The stereo headset acts as an antenna.

23. Reset Button

With the stylus, press the reset button to soft-reset your device.

24. Power button

Press Power to turn off the display temporarily. This will switch it to Sleep mode. You can still receive calls and messages when your Xda Orbit 2 is in Sleep mode. Press and hold for about five seconds to turn off the power completely. This makes all the functions, including the phone, unavailable.
